PROJECTS

Turtle game *Python*   https://github.com/Henrycodeproj/Turtle-python-wall-game

This is a game that is made with a python library called Turtle. The goal of this project was to work and strengthen my python fundamentals through game logic. This project works with a timer, player functions, maintaining scores as well as wall counters of each player.

Flask blog Project *Python, Flask, Html, CSS, Bootstrap, Postgres, SQL*   N/A

This is the most recent project that is still currently being worked on. The idea behind this project is to build a blog that will discuss board games and will be a full stack project that will handle users information through a database
